PROFESSIONAL SUMMARY

Results-driven Data & Business Analyst with a strong technical foundation in SQL, Python, Advanced Excel/Google Workspace, and Power BI/Tableau. Skilled in bridging technical data processing with strategic business needs—transforming complex datasets into actionable business intelligence, interactive dashboards, and process automation solutions. Experienced in end-to-end data pipeline design, anomaly detection, regulatory compliance, and cross-functional reporting. Passionate about leveraging data insights to optimize operational workflows and drive scalable, data-informed business decisions.

CORE COMPETENCIES & TECHNICAL SKILLS

- Data Analysis & Visualization:** Advanced Excel / Google Sheets (Power Query, Formulas, VBA), Power BI, Tableau, Star Schema
- Programming & Query Languages:** SQL (PostgreSQL, Joins, Window Functions), Python (Pandas, Data Manipulation)
- Business Analysis & Operations:** Business Intelligence, Requirements Gathering, Process Automation, Data Lifecycle Management
- Professional & Soft Skills:** Problem-Solving, Critical Thinking, Cross-Functional Communication, Risk & Compliance Reporting

KEY ANALYTICS PROJECTS

Global Supply Chain & Inventory Automation Engine — Excel/Google Sheets, Power Query, VBA

- Cleaned and structured large-scale logistics datasets using Power Query, establishing automated validation rules to ensure data integrity.
- Designed interactive dashboards featuring dynamic slicers and custom macros to streamline inventory reporting and tracking.
- Wrote automated trigger scripts to identify stock deficiencies, auto-generating structured summary alerts for procurement teams.

Multi-National Renewable Energy Performance Pipeline — PostgreSQL, Power BI

- Built an end-to-end data pipeline using PostgreSQL window functions to evaluate time-series generation metrics across global infrastructures.
- Identified performance drop-offs and operational anomalies, converting raw performance logs into predictive maintenance insights.
- Modeled an enterprise Power BI dashboard with custom DAX measures to translate complex operational data into executive key performance indicators.

International E-Commerce Dynamic Pricing Engine — Python, PostgreSQL, Tableau

- Developed an automated market intelligence workflow using Python (Pandas) to merge and standardize multi-currency competitor pricing.
- Deployed an interactive Tableau dashboard connected to PostgreSQL to visualize regional price elasticity and profit opportunities.

WORK EXPERIENCE

Safety & Compliance Data Coordinator (Contract)

Sept 2024 – Nov 2024

Shilpi Engineering Pvt Ltd (BPCL Refinery Shutdown Project)

- Maintained and audited daily operational logs, risk metrics, and compliance documentation during high-stakes refinery operations.
- Analyzed site incident tracking data and compiled structured safety and risk reports for engineering leadership and project stakeholders.

EDUCATION

MBA in Business Analytics — NMIMS

Enrolled (July 2026 – July 2028)

Professional Diploma in Data Analytics — Edure Learning

In Progress

Bachelor of Business Administration (BBA) — UIT, Kollam

2024

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera (In Progress)
- NEBOSH International General Certificate in Occupational Health & Safety – 2024
